

Kitsch Kitchen Spring collection 2010

It is still cold outside, but our new print Ranita and the Mexican party item piñata will bring you into a spring mood immediately. On top of that, French Bull items are presented, the New York label distributed by Kitsch Kitchen in Europe. The new collection of Kitsch Kitchen will be presented in our catalogue and on fairs all over the world.

The Kitsch Kitchen spring design: Ranita

Again Kitsch Kitchen has designed her own print. This spring will be dominated by Ranita, Spanish for frog. Like old fashioned search games, it will take some time before you'll find the little frog on this print. This print is available in 4 different colours on oilcloth on the roll or can be found in several bags.

French bull

The new design of melamine exists from a colourful collage, named "collage". Besides this design, French Bull also presents her new astrology line. Twelve different porcelain cups in constellations.

Piñata

Kitsch Kitchen introduces a Latin-American tradition in Holland. The piñata is made of glued paper in the shape of an animal or cartoon figure. On a birthday party, the piñata can be stuffed with confetti, sweets etc. and then hang the it to the ceiling. Now hit the piñata blindfolded until it breaks and the sweets fall out. This tradition is guaranteed for hilarious moments.

You can find our new collection on one of the following fairs:
